

JUNE 2023

Safety Review

VOLUME 22

Safety Review June

Good Housekeeping ... more than meets the eye!

Effective housekeeping can greatly reduce injuries and eliminate a lot of workplace hazards on a construction site. An effective housekeeping program is not a one-time "Spring Cleaning" exercise. Effective housekeeping programs are ongoing to eliminate hazards.

Benefits

There are major benefits to good, ongoing housekeeping on a construction site. Immediately slips, trips, and falls from debris and clutter are eliminated. Fire hazards and worker exposure to excess dust or vapors are reduced to a manageable amount. Good housekeeping reduces material handling and allows for better control of tools, material, and production of work. One of the most unspoken benefits of good housekeeping is improved morale and teamwork. When employees are working in a clean, organized environment it is proven to reduce stress in their jobs and reduce conflict between trades people.

Fewer trips,
slips, and
falls from
clutter/spill
free areas

Decrease
fire
hazards

Lower
exposure to
hazardous
products such
as dust and
vapors

Reduction in
unnecessary
material and
handling

Better control
of materials
and tools for
inventory or
maintenance
